Creative Makers: Simple Knitting Ros Badger
2013-10-01 Knitting is cool again. Knitting groups are springing up everywhere and those of us who perhaps learned to knit as children and then forgot about it are now rediscovering the joys of sitting down with friends, some beautiful yarn and a pair of nice chunky needles.

Contemporary knitting queen Ros Badger has created more than 20 really simple projects for gorgeous on-trend accessories - gloves, socks, scarves, bags, and even knitted jewelry. For those new to knitting, Ros provides all the information you need to get started, with an overview of yarns, terminology and step-by-step instructions on how to knit. All the projects in the

book are made with just two stitches (either knit or purl) and most use simple squares, oblongs or tubes for super-easy knitting. Gorgeous photography by top lifestyle photographer Yuki Sugiura captures the sheer pleasure of knitting what you wear.

Making Sense of Data II Glenn J. Myatt 2009-03-04
A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques
This second installment in the Making Sense of Data series continues

to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, *Making Sense of Data II* addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations

of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com)

provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceis™ software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, Making Sense of Data II is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization.

Own Zoo! With easy-to-follow, step-by-step instructions for 24 animals, it's an irresistible guide to knitting a single exotic pet or an entire stuffed menagerie. What could be better than a cuddly koala or a long-necked giraffe to call your own? Knit Your Own Zoo includes patterns for both, as well as a tiger, crocodile, penguin, meerkat, elephant, armadillo, panda, a kangaroo and her joey, and 14 other delightful creatures. The animals are surprisingly easy to make; with a few evenings of work, you can have a covetable companion for life. Given a week, you could be charging admission to your own nature park! Along with the knitting patterns, Sally and Joanna also include brief descriptions of the various species and offer tips and advice on sewing up and embellishing the animals. And, of course, these knitted animals are much easier to look after than the real things?they don't eat, won't make a mess, and are legal to keep in your home.

When God Goes to

Starbucks Paul Copan

2008-08-01 More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate

the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In *When God Goes to Starbucks*, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.

Post-Mortem Journal Communications from Lawrence of Arabia Through the Mediumship of Jane Sherwood Jane Sherwood 2009-07 There is probably no

stranger nor more controversial book than Jane Sherwood's report, through automatic writing, of the identity of a communicator from the other side of the grave who chose to call himself 'Scott'. After many years of enforced silence, as a result of a solemn promise given to Scott, Jane Sherwood reveals his true identity, namely, Colonel T. E. Lawrence (Lawrence of Arabia). *Post-Mortem Journal* opens at the moment of Lawrence's death when he finds himself lying at the roadside by his shattered motorbike, unaware that he is actually 'dead'. It continues over the years and shows us the development and salvation of a tortured and guilty man who, for the first time, is forced into admitting his weaknesses and vanities during his earthly life and is only now able to come to terms with himself. Such revelations are both harrowing and magnificent. 'As to the validity', says Jane Sherwood, 'of the information contained in "Scott's" journal I can only vouch for my own

When the School Horse was King : a Tribute to Faithful Friends and Companions John C. Charyk 1988-06

Designing and Evaluating Usable Technology in Industrial Research Clare-Marie Karat 2010 This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce,

and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial

research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

Law: A Very Short Introduction
Raymond Wacks 2008-03-27
Law underlies our society - it protects our rights, imposes duties on each of us, and establishes a framework for the conduct of almost every social, political, and economic activity. The punishment of crime, compensation of the injured, and the enforcement of contracts are merely some of the tasks of a modern legal system. It also strives to achieve justice, promote

freedom, and protect our security. The result is a system that, while it touches all of our daily lives, is properly understood by only a few, with its impenetrable jargon, obsolete procedures, and interminable stream of Byzantine statutes and judgments of the courts. This clear, jargon-free Very Short Introduction aims to redress that balance, as it introduces the essentials of law and legal systems in a lively, accessible, and stimulating manner. Explaining the main concepts, terms, and processes of the legal system, it focuses on the Western tradition (the common law and the civil law), but also includes discussions of other legal systems, such as customary law and Islamic law. And it looks to the future too, as globalization and rapid advances in technology place increasing strain on our current legal system.

ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area.

These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Desert Views & Flower Hues

Yvonne Weaver 2014-07-18

Yvonne Weaver created this coloring book to provide hours of enjoyment. Yvonne has chosen to make each page something children of all ages can color and enjoy with their family and friends. She has included desert scenes as well as reptiles and migratory birds who visit the wetland areas.

The flowers are just for fun; she loves to color them herself. The desert comes alive in the spring with many beautiful colored wildflowers. The desert scenery changes colors as the sun rises and sets. Yvonne saw a need for a coloring book to encourage children to love our planet and care for our wildlife. She suggests, "Just have fun with it."

Educational Administration and Leadership Identity Formation

Eugenie A. Samier 2020-07-31

Educational Administration and Leadership Identity Formation explores approaches and issues that arise in leadership identity

formation in a variety of educational contexts. Bringing together a range of national and international contributions, this volume provides a global perspective on this multi-dimensional topic. This book examines the theoretical foundations relevant to identity and identity formation, and their implications for researching and teaching in educational administration and leadership. It includes a range of sociological, psychological, political, cultural, and socio-linguistic approaches to examining leadership identity formation. It also addresses models, practices and experiences that vary according to identity politics, cultural difference, and historical and contemporary privilege in leadership identity formation. Working from theoretical and practice-base perspectives, this book will be of great interest for researchers, practitioners, policy-makers and academics, as well as students in teacher education programs and graduate courses in

educational administration and leadership, organisational studies, and educational ethics for broad international use.

Prince2 Foundation

Training Manual

Van Haren Publishing 2017-01-15 Thank you for reading our PRINCE2

Foundation Training Manual.

The main objective of this book

is to provide an easy-to-read

and easy-to-understand

PRINCE2(R) Foundation

training manual. The official

PRINCE2 manual, "Managing

Successful Projects with

PRINCE2," is an excellent

reference manual, but it is not

a training manual and should

not be used as one, as it is very

difficult to comprehend and

understand if you are new to

project management. The

official PRINCE2 manual also

covers the complete

Practitioner Syllabus, and it's

impossible to know which parts

are just focused on the

PRINCE2 Foundation syllabus,

so you have to read everything,

which is not good if you are

just studying for the foundation

exam. Henceforth, this book is

meant to be (and is) an easy

introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

XNA 4 3D Game Development by Example Kurt Jaegers

2012-09-25 Create action-packed 3D games with the Microsoft XNA Framework. *The Withers Awaken* Mark Cheverton 2018-07-03 Krael, the Wither King, has been trapped deep underground, ending his reign of terror, and all the NPCs of the Far Lands have all put away their swords in peace except Watcher; the young archer still suspects Krael has bigger plans. He's right. In the darkness of the Cave of Slumber, Krael awakens the imprisoned wither horde, and with the help of creepers and endermen, the wither army is released from their rocky jail. They spread across the Far Lands, searching for the ancient Vault of Weapons which will make the army of withers indestructible. But one man

alone holds the secret to the Vault's whereabouts: the Far Land's last living NPC wizard. Watcher and his friends must race to find the wizard before Krael and his army of monsters. But if they fail, a wave of destruction, led by the King of the Withers, will sweep across the landscape, destroying everything—and everyone—they know.

Visual Basic 2008 Paul J. Deitel 2009 Appropriate for all basic-to-intermediate level courses in Visual Basic 2008

programming. Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest

Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. Students begin by getting comfortable with the free Visual Basic Express 2008 IDE and basic VB syntax included on the CD. Next, they build their skills one step at a time, mastering control structures, classes, objects, methods, variables, arrays, and the core techniques of object-oriented programming. With this strong foundation in place, the Deitels introduce more sophisticated techniques, including

inheritance, polymorphism, exception handling, strings, GUI's, data structures, generics, and collections. Throughout, the authors show developers how to make the most of Microsoft's Visual Studio tools. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

The Only Guide to Alternative Investments You'll Ever Need

Larry E. Swedroe 2010-05-13 The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-protected securities, Commodities, International equities, Fixed annuities, Stable-value funds,

High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book.

Leadership Coaching Tony

Stoltzfus 2005-06-28

Leadership Coaching is an essential tool for anyone who wants to learn to coach or improve their coaching skills. Written by a top Christian coach trainer, it is filled with real-life stories, practical tools and application exercises that bring coaching techniques to life. Part I is an in-depth look at how coaching fits with the purposes of God. Starting with key biblical concepts about how God builds leaders, this book goes beyond proof-texting to present an integrated, values-based paradigm for leadership coaching. Part II uses a hands-on, interactive approach to show you how to coach. Utilizing the seven key elements of effective coaching as a framework, each facet of the coaching relationship is explained in detail. Then follow-up Master Class sections help you internalize the key concepts and try them out in real life. Leadership coaching is a great introduction to a powerful way of helping others grow.
