Crime Wave Howard Hughes 2006-05-26 Crime movies inhabit dark and desperate worlds, yet they account for many of Hollywood's most triumphant successes. In full acknowledgement of this achievement, "Crime Wave" offers an authoritative and informative, stimulating and entertaining guide to the crime movie phenomenon, from its early days to the present, charting its history and celebrating the people who have

given it a special and enduring place in cinema goers' affections. Chapters focus on landmark Hollywood films - from 1931's "The Public Enemy", through "The Maltese Falcon", "Point Blank", "Dirty Harry", "The Godfather" trilogy and "Goodfellas", to "LA Confidential" and "Oceans 11" - telling their stories and on the way discussing many more crime movies, both major and lesser known. "Crime Wave" represents and investigates gangster and heist movies, blaxploitation and noir, murder mysteries, vehicles for vigilante or buddy cops, even a gangster love story. It features biographies and filmographies detailing the key participants and background details of the film's making, locations and sets. It also explores each film's sources and influences, its impact on the crime genre and current fashion, including spin-offs, copies and sequels. It examines the films' themes, style and box office fortunes. Detailed cast list information is provided for each of the main featured films. Written with passion, for those who love this cinema, "Crime Wave" is the perfect partner in crime.

Understanding Manga and Anime Robin E. Brenner 2007-06-30 Teens love it. Parents hate it. Librarians are confused by it; and patrons are demanding it. Libraries have begun purchasing both manga and anime, particularly for their teen collections. But the sheer number of titles available can be overwhelming, not to mention the diversity and quirky cultural conventions. In order to build a collection, it is important to understand the media and its cultural nuances. Many librarians have been left adrift, struggling to understand this unique medium while trying to meet patron demands as well as protests. This book gives the novice background information necessary to feel confident in selecting, working with, and advocating for manga and anime collections; and it offers more experienced librarians some fresh insights and ideas for programming and collections. This book gives the novice background information necessary to feel confident in selecting, working with, and advocating for manga and anime collections; and it offers more experienced librarians some fresh insights and ideas for programming and collections. In 2003 the manga (Japanese comics) market was the fastest growing area of pop culture, with 75-100% growth to an estimated market size of \$100 million retail. The growth has continued with a 40-50% sales increase in bookstores in recent years. Teens especially love this highly visual, emotionally charged and action-packed media imported from Japan, and its sister media, anime (Japanese animation); and libraries have begun purchasing both. Chock full of checklists and sidebars highlighting key points, this book includes: a brief history of anime and manga in Japan and in the West; a guide to visual styles and cues; a discussion of common themes and genres unique to manga and anime; their intended audiences; cultural differences in format and content; multicultural trends that manga and anime readers embrace and represent; and programming and event ideas. It also includes genre breakdowns and annotated lists of recommended titles, with a focus on the best titles in print and readily available, particularly those appropriate to preteen and teen readers. Classic and benchmark titles are also mentioned as appropriate. A glossary and a list of frequently asked questions complete the volume.

The Dragon and the Dazzle Marco Pellitteri 2010 Marco Pellitteri examines the growing influence of Japanese pop culture in European contexts in this comprehensive study of manga, anime, and video games. Looking at the period from 1975 to today, Pellitteri discusses Super Mario, Pokémon, kawaii, Sonic, robots and cyborgs, Astro Boy, and Gundam, among other examples of these popular forms. Pellitteri divides this period into two eras ("the dragon" and "the dazzle") to better understand this cultural phenomenon and means by which it achieved worldwide distribution.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

An A to Z of Almost Everything Trevor Montague 2003 In this new edition, the original topics have been brought up to date, added to and elaborated upon: Abbreviations, for example, now includes an essential array of chat room acronyms: Fashion boasts a complete list of British Hairdressers of the Year; and Music features a comprehensive listing of every top-ten single in the last forty years. And there are a wealth of new subjects to be discovered and enjoyed too, from the Top Tens of 2002 to world coins and paper money, bingo calls to crime and punishment, the Mr Men books to the works of Charles Dickens. What can be Big Boy, Early Girl or Supersonic? Which British Prime Minister links John Lennon and Gary Lineker? Which classic novel begins 'Now, what I want is facts'? (See Reviews for Answers) This monumental work of reference is a must-have title on your bookshelf - both an enjoyable book to dip into and a cornucopia of sheer fact.

A Concise History of Japan Brett L. Walker 2015-02-26 To this day, Japan's modern ascendancy challenges many assumptions about world history, particularly theories regarding the rise of the west and why the modern world looks the way it does. In this engaging new history, Brett L. Walker tackles key themes regarding Japan's relationships with its minorities, state and economic development, and the uses of science and medicine. The book begins by tracing the country's early history through archaeological remains, before proceeding to explore life in the imperial court, the rise of the samurai, civil conflict, encounters with Europe, and the advent of modernity and empire. Integrating the pageantry of a unique nation's history with today's environmental concerns, Walker's vibrant and accessible new narrative then follows Japan's ascension from the ashes of World War II into the thriving nation of today. It is a history for our times, posing important questions regarding how we should situate a nation's history in an age of environmental and climatological uncertainties.

Intelligent Projects Using Python Santanu Pattanayak 2019-01-31 Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive

using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn

- Build an intelligent machine translation system using seq-2-seq neural translation machines
- Create AI applications using GAN and deploy smart mobile apps using TensorFlow
- Translate videos into text using CNN and RNN
- Implement smart AI Chatbots, and integrate and extend them in several domains
- Create smart reinforcement, learning-based applications using Q-Learning
- Break and generate CAPTCHA using Deep Learning and Adversarial Learning

Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

Nuclear War Raymond G. Wilson 2014-07-02 Nuclear War: Hiroshima, Nagasaki, and A Workable Moral Strategy for Achieving and Preserving World Peace Raymond G. Wilson "The real truth of the matter is, as you

and I know, that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson." □Franklin D. Roosevelt There is considerable reason to believe President Roosevelt's statement is quite true, thus the "financial element in the large centers" shares responsibility and blame for the tens, if not hundreds, of thousands of war deaths in the last two decades. The people of the world need protection from those responsible for provoking nations to war. In the United States this responsibility lies with all elements in the highest levels of government, the decision makers. It lies with those who tinker with political and economic machinations, most likely for the advantage of "a financial element in the large centers." These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world. This group of people may include most people serving in the U.S. Congress and from personal experience many in the U.S. Military. I have my doubts whether Presidents have seen all of the results of the world's first nuclear war; they are probably shielded from this. Photographs of the victims were confiscated and held confidential for more than 22 years after 1945. There were well more than 210,000 victims; not many photographs were made and survived. You can learn from this book a tiny fraction of the truth about what happens to people caught in nuclear war. (Although the truth from more than 210,000 will never be heard.) In a future war there would be hundreds of thousands, more likely hundreds of millions, of victims. The United States government has not revealed this kind of truth about its first nuclear war. As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki. In Chapter 5 a solution is suggested to save us all from our "nuclear madness." "I hate war as only a soldier who has lived it can, only as one who has seen its brutality, its futility, its stupidity." --Dwight D. Eisenhower, ..".we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages. We have the ability to cultivate self-control and consideration for others and to strive to live together in a humane and harmonious manner with others. The revival of such true

humanity--not only between individuals, but also between nations--is an absolute necessity today, for the age has come when one nation's self-centered behavior could lead all humanity to annihilation." --Naomi Shohno, 1986 "America can do whatever we set our mind to." —Barack Obama

Chilton Labor Guide (Chilton) Chilton 2003-12-01 Professional technicians have relied on the Chilton Labor Guide estimated repair times for decades. This latest edition expands on that reliability by

including technical hotline feedback and research from professional labor experts. The labor times reflect actual vehicle conditions found in the aftermarket, including rust, wear and grime. Available in both hardcover and CD-ROM, this completely revised manual provides thousands of labor times for 1981 through current year domestic and imported vehicles. All times reflect technicians' use of aftermarket tools and training.
