The White Glove War Katie Crouch 2012-07-03 Money, beauty, power, and love -- the youngest members of the Magnolia League have it all. Some may call them lucky, but the truth is they're charmed. Armed with spells, potions, and conjures from the powerful Buzzard family, the Magnolias have bought their luck...at a price. Enconced in the League's headquarters on Habersham street, golden girl Hayes Anderson would never dream of leaving Savannah, where there's no problem that can't be solved with a cup of Swamp Brew tea. But when danger lurks and family secrets are unearthed, Hayes learns that magic can't fix everything. Across town at an old mansion on Forsyth Park, recent California transplant Alexandria Lee is on a quest to free her mother's spirit from a hoodoo spell. As dark magic sweeps through Savannah's historic squares and misty backwaters, will Hayes and Alex have the strength to save the people they love -- and themselves? Katie Crouch's second Magnolia League novel is a beguiling story about family, friendship, and the magical ties that bind.

Drug Policies and the Politics of Drugs in the Americas Beatriz Caiuby Labate 2016-07-30 This book is a collection of studies of drug policies in several Latin American countries. The chapters analyze the specific histories of drug policies in each country, as well as related phenomena and case studies throughout the region. It presents conceptual reflections on the origins of prohibition and the "War on Drugs," including the topic of human rights and cognitive freedom. Further, the collection reflects on the pioneering role of some Latin American countries in changing paradigms of international drug policy. Each case study

provides an analysis of where each state is now in terms of policy reform within the context of its history and current socio-political circumstances.

Concurrently, local movements, initiatives, and backlash against the reformist debate within the hemisphere are examined. The recent changes regarding the regulation of marijuana in the United States and their possible impact on Latin America are also addressed. This work is an important, up-to-date and well-researched reference for all who are interested in drug policy from a Latin American perspective.

The Chemical Industry in Europe, 1850-1914 Ernst Homburg 2013-03-14 Europe is the cradle of the modern international chemical industry. From the middle of the nineteenth century until the outbreak of World War I, the European chemical industry influenced not only the production and control of science and technology, but also made significant contributions towards economic development, as well as bringing about profound changes in working and living environments. It is a highly complex heritage, both rich and threatening, that calls for close scrutiny. Fortunately, a unique opportunity to explore the historical development of the European chemical industry from a variety of novel standpoints, was made possible during 1993 as part of the European Science Foundation (ESF) programme called 'The Evolution of Chemistry in Europe, 1789-1939.' This process of exploration has taken place through three workshops, each dealing with different time periods. The workshop concerned with the period 1850-1914, which corresponds roughly to the so-called Second Industrial Revolution, was held in Maastricht, The Netherlands, on 23-25 March 1995. This volume is the outcome of that workshop. The other workshops dealing with European chemical industry were held in Liege in 1994, covering the First Industrial Revolution period, 1789-1850, and Strasbourg in 1996, covering

the period between the two World Wars.

The Future of Law and Economics Guido Calabresi 2016-01-28 In a concise, compelling argument, one of the founders and most influential advocates of the law and economics movement divides the subject into two separate areas, which he identifies with Jeremy Bentham and John Stuart Mill. The first, Benthamite, strain, "economic analysis of law," examines the legal system in the light of economic theory and shows how economics might render law more effective. The second strain, law and economics, gives equal status to law, and explores how the more realistic, less theoretical discipline of law can lead to improvements in economic theory. It is the latter approach that Judge Calabresi advocates, in a series of eloquent, thoughtful essays that will appeal to students and scholars

alike.

Their utilization has co-evolved with homo sapiens itself bringing about a profound increase in our scientific knowledge of these species enabling them to be used in many facets of our life (e.g. pharmaceutical products, feed- and food additives, cosmetics, etc.). Remarkably, despite the new renaissance of MAPs usage, ca. 80 % of the world's population is relying on natural substances of plant origin, with most of these botanicals sourced from the wild state. C.P. Cavafy C. P. Cavafy 2020-05-26 C. P. Cavafy (1863-1933) lived in relative obscurity in Alexandria, and a collected edition of his poems was not published until after his death. Now, however, he is regarded as the most important figure

in twentieth-century Greek poetry, and his poems are considered among the most powerful in modern European literature. Here is an extensively revised edition of the acclaimed translations of Edmund Keeley and Philip Sherrard, which capture Cavafy's mixture of formal and idiomatic use of language and preserve the immediacy of his frank treatment of homosexual themes, his brilliant re-creation of history, and his astute political ironies. The resetting of the entire edition has permitted the translators to review each poem and to make alterations where appropriate. George Savidis has revised the notes according to his latest edition of the Greek text. About the first edition: "The best [English version] we are likely to see for some time."--James Merrill, *The New York Review of Books* "[Keeley and Sherrard] have managed the miracle of capturing this elusive, inimitable, unforgettable voice. It is the most haunting voice I know in modern poetry."--Walter Kaiser, *The New Republic* ?
