[Intelligent Projects Using Python](#) Santanu Pattanayak 2019-01-31 Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI

algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful

projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build

autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals,

and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

The Magic Drum and Other Favourite Stories

Sudhā Mūr̥ti 2006 A princess thinks she was a bird, a coconut that cost a thousand rupees, and a shepherd with a bag of words...Kings and misers, princes and paupers, wise men and foolish boys, the funniest and oddest men and women come alive in this sparkling new collection of stories. The clever princess will only marry the man who can ask her a question she cannot answer; the orphan boy outwits his greedy uncles with a bag of ash; and an old couple in distress is saved by a magic drum. Sudha Murty's grandparents told her some of these stories when she was a child; others she heard from her friends from around the world. These delightful and timeless folktales have been her favourites for years, and she has recounted them many times over to the young people in her life. With this collection, they will be enjoyed by many more readers, of all ages. Age group of target audience is 8+.

The Rejection of Consequentialism Samuel Scheffler

1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism

seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Literary Cultures and Twenty-First-Century

Childhoods Nathalie op de Beeck 2020-08-05 In the early decades of the twenty-first century, we are grappling with the legacies of past centuries and their cascading effects upon children and all people. We realize anew how imperialism, globalization, industrialization, and revolution continue to reshape our world and that of new generations. At a volatile moment, this collection asks how twenty-first century literature and related media represent and shape the contemporary child, childhood, and youth. Because literary representations construct ideal childhoods as well as model the rights, privileges, and respect afforded to actual young people, this collection surveys examples from popular culture and from scholarly practice. Chapters investigate the human rights of children in literature and international policy; the potential subjective agency and power of the child; the role models proposed for young people; the diverse

identities children embody and encounter; and the environmental well-being of future human and nonhuman generations. As a snapshot of our developing historical moment, this collection identifies emergent trends, considers theories and critiques of childhood and literature, and observes how new technologies and paradigms are destabilizing past conventions of storytelling and lived experience.

Whiskey Days Tommy Gaffney 2009-10 Whiskey Days is the second full-length collection of memoir-

driven works by Kentucky native Tommy Gaffney. Both the short stories and the poems in this volume invoke the emotional high wire of an author writing without a net, veering between the humorous and the abysmally raw that lay on either side of his narratives. The results this time show the growing maturity of both the scribe and the man and offer an intelligent conversation with the bar room professor on the stool beside you.

Everyman's Dictionary of Economics Arthur Seldon
1976 Everyman's Dictionary of Economics, the third volume of The Collected Works of Arthur Seldon, translates the often obscure jargon and technical terminology of economics into direct, plain English understandable by both the academic and the layperson. The most abstruse topic becomes clear as he conveys the sense in ordinary language, without loss of meaning through oversimplification. Everyman's Dictionary of Economics covers a wide range of economic thought and includes every relevant term that the average person might encounter in a written or other treatment of the subject. In addition to conveying a sense of how economic thought has evolved over the centuries,

the Dictionary stimulates and challenges readers in its questioning of conventional wisdom about government intervention and manipulation of economies. It too has "stood the test of time"; nearly thirty years after the second edition and forty years after the first, this book still engages readers--economists and nonprofessionals alike. Everyman's Dictionary of Economics, Volume 3 of The Collected Works of Arthur Seldon, is an indispensable reference for laypeople and for academics. The entire series includes: Volume 1: The Virtues of Capitalism (September 2004) Volume 2: The State Is Rolling Back (November 2004) Volume 3: Everyman's Dictionary of Economics (January 2005) Volume 4: Introducing Market Forces into "Public" Services (February 2005) Volume 5: Government Failure and Over-Government (May 2005) Volume 6: The Welfare State: Pensions, Health, and Education (October 2005) Volume 7: The IEA, the

LSE, and the Influence of Ideas (December 2005)
