The Future of Nursing Institute of Medicine 2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Breaking Intergenerational Cycles of Repetition Pumla Gobodo-Madikizela 2016-01-18 The authors in this volume explore the interconnected issues of intergenerational trauma and traumatic memory in societies with a history of collective violence across the globe. Each chapter's discussion offers a critical reflection on historical trauma and its repercussions, and how memory can be used as a basis for dialogue and transformation. The perspectives include, among others: the healing journey of three generations of a family of Holocaust survivors and their dialogue with third generation German students over time; traumatic memories of the British concentration camps in South Africa; reparations and reconciliation in the context of the historical trauma of Aboriginal Australians; and the use of the arts as a strategy of dialogue and transformation.

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Acting Together I: Performance and the Creative Transformation of Conflict Cynthia Cohen 2011-07-22 Courageous artists working in conflict regions describe exemplary peacebuilding performances and groundbreaking theory on performance for transformation of violence. Acting Together: Performance and the Creative Transformation of Conflict is a two-volume work describing peacebuilding performances in regions beset by violence and internal conflicts. Volume I: Resistance and Reconciliation in Regions of Violence, emphasizes the role theatre and ritual play both in the midst and in the aftermath of direct violence, while Volume II: Building Just and Inclusive Communities, focuses on the transformative power of performance in regions fractured by "subtler" forms of structural violence and social exclusion. Volume I: Resistance and Reconciliation in Regions of Violence focuses on the role theatre and ritual play both in the midst and in the aftermath of violence. The performances highlighted in this volume nourish and restore capacities for expression, communication, and transformative action, and creatively support communities in grappling with conflicting moral imperatives surrounding questions of justice, memory, resistance, and identity. The individual chapters, written by scholars, conflict resolution practitioners, and artists who work directly with the communities involved, offer vivid firsthand accounts and analyses of traditional and nontraditional performances in Serbia, Uganda, Sri Lanka, Palestine, Israel, Argentina, Peru, India, Cambodia, Australia, and the United States. Complemented by a website of related materials, a documentary film, Acting Together on the World Stage, that features clips and interviews with the curators and artists, and a toolkit, or "Tools for Continuing the Conversation," that is included with the documentary as a second disc, this book will inform and inspire socially engaged artists, cultural workers, peacebuilding scholars and practitioners, human rights activists, students of peace and justice studies, and whoever wishes to better understand conflict and the power of art to bring about social change. The Acting Together project is born of a collaboration between Theatre Without Borders and the Program in Peacebuilding and the Arts at the International Center for Ethics, Justice, and Public Life at Brandeis University. The two volumes are edited by Cynthia E. Cohen, director of the aforementioned program and a leading figure in creative approaches to coexistence and reconciliation; Roberto Gutierrez Varea, an award-winning director and associate professor at the University of San Francisco; and Polly O. Walker, director of Partners in Peace, an NGO based in Brisbane, Australia..

Critical Methods for the Study of World Politics Shine Choi 2019-12-17 This book develops an approach to both method and the socio-political implications of knowledge production that embraces our embeddedness in the world that we study. It seeks to enact the transformative potentials inherent in this relationship in how it engages readers. It presents a creative survey of some of the newest developments in critical research methods and critical pedagogy that together go beyond the aims of knowledge transfer that often structure our practices. Each contribution takes on a different shape, tone and orientation, and discusses a critical method or approach, teasing out the ways in which it can also work as a transformative practice. While the presentation of different methods is both rigorously practice-based and specific, contributors also offer reflections on the stakes of critical engagement and how it may play an important role in expanding and subverting existing regimes of intelligibility. Contributions variously address the following key questions: What makes your research method important? How can others work with it? How has research through this method and/or the way you ended up deploying it transformed you and/or your practice? How did it matter for thinking about community, (academic) collaboration, and sharing 'knowledge'? This volume makes the case for re-politicizing the importance of research and the transformative potentials of research methods not only in 'accessing' the world as an object of study, but as ways of acting and being in the world. It will be of interest to students and scholars of international relations, critical theory, research methods and politics in general.

Theatre Pedagogy in the Era of Climate Crisis Conrad Alexandrowicz 2021-05-03 This volume explores whether theatre pedagogy can and should be transformed in response to the global climate crisis. Conrad Alexandrowicz and David Fancy present an innovative re-imagining of the ways in which the art of theatre, and the pedagogical apparatus that feeds and supports it, might contribute to global efforts in climate protest and action. Comprised of contributions from a broad range of scholars and practitioners, the volume explores whether an adherence to aesthetic values can be preserved when art is instrumentalized as protest and considers theatre as a tool to be employed by the School Strike for Climate movement. Considering perspectives from areas including performance, directing, production, design, theory and history, this book will prompt vital discussions which could transform curricular design and implementation in the light of the climate crisis. Theatre Pedagogy in the Era of Climate Crisis will be of great interest to students, scholars and practitioners of climate change and theatre and performance studies.

But Abu Ibrahim, We're Family! Lee Perlman 2017 "'But Abu Ibrahim, We're Family!' is a series of case studies describing collaborations between Jewish and Palestinian professional theater artists in Israel and the theater they create about their realities. It depicts the ways the artists navigate shifting power dynamics and relations between them, while working together to overcome external social and political forces which run counter to their work. It analyzes the socio-political and socio-cultural significance of four 'joint productions,' collaborative professional theater productions by Jewish and Palestinian citizens of the State of Israel between 2000-2010. In these productions, Jewish Israelis and Palestinians share a stage and essentially wage the conflicts between them non-violently. These productions both represent and reflect the conflictual relations between these two national groups, by attempting to understand, present, often satirize and transform these conflicts on stage. These productions serve as a tentative model of shared citizenship in the work place - how Jewish Israelis and Palestinians can work together in professional settings, through ongoing negotiation towards equality within the present political situation. The productions attempted and invariably succeeded in challenging inequality and disenfranchisement, amplifying the non-hegemonic voices of Palestinian citizens, that lie outside the norm of and are often excluded from social and political discourse in Israel's Jewish polity"--

Dancing Conflicts, Unfolding Peaces Paula Ditzel Facci 2020-08-13 This book explores the potential of movement as a means of eliciting conflict transformation and unfolding peace at the intrapersonal and relational levels. It examines how peace and dance have been related in different cultures and investigates embodied ways to creatively tap the energies of conflicts, inspiring possibilities of transformation and new dynamics in relationships. Drawing on Wolfgang Dietrich's Many Peaces theory, the book discusses how different expressions of dance have been connected to different interpretations of peace and strategies for transformation. Delving into elicitive approaches to conflict transformation, the book develops an innovative framework for applying movement as an elicitive method, which it vividly presents through the author's own experiences and interviews with participants in workshops. Given its scope, the book will appeal to scholars, practitioners and artists working at the nexus of peace, conflict transformation and the arts.

To the Actor Michael Chekhov 2017-04-07 In To the Actor Michael Chekhov has recorded brilliantly the results of his many years of experimenting, testing and verifying in the professional theater and schools of the theater. He brings to actors far greater insight into themselves and the characters they are to portray, which enables them to approach any role with new ease and skill. "To the Actor is by far the best book that I have read on the subject of acting. Actors, directors, writers and critics will be grateful for it. It should prove enlightening to theatergoers who wish to deepen their appreciation for fine acting and thus help to invigorate the theatrical art."—Gregory Peck "I think without a doubt every creative person in the theater will want to have it as a constant reference book, outside of its being, in my opinion, absorbing and entertaining reading."—Yul Brynner (from the Preface) "One of the most remarkable and practical books on the technique of acting I have ever read...Enthusiastically recommended to all theatre collections of whatever size."—Library Journal

Lord of the Flies William Golding 2003-12-16 Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Culture & Conflict Resolution Kevin Avruch 1998 After years of relative neglect, culture is finally receiving due recognition as a key factor in the evolution and resolution of conflicts. Unfortunately, however, when theorists and practitioners of conflict resolution speak of culture, they often understand and use it in a bewildering and unhelpful variety of ways. With sophistication and lucidity, "Culture and Conflict Resolution" exposes these shortcomings and proposes an alternative conception in which culture is seen as dynamic and derivative of individual experience. The book explores divergent theories of social conflict and differing strategies that shape the conduct of diplomacy, and examines the role that culture has (and has not) played in conflict resolution. The author is as forceful in critiquing those who would dismiss or diminish culture's relevance as he is trenchant in advocating conflict resolution approaches that make the most productive use of a coherent concept of culture. In a lively style, Avruch challenges both scholars and practitioners not only to develop a clearer understanding of what culture is, but also to take that understanding and incorporate it into more effective conflict resolution processes."

Peacebuilding and the Arts Jolyon Mitchell 2019-11-19 "Ending violent conflict requires societies to take leaps of political imagination. Artistic communities are often uniquely placed to help promote new thinking by enabling people to see things differently. In place of conflict's binary divisions, artists are often charged with exploring the ambiguities and possibilities of the excluded middle. Yet, their role in

peacebuilding remains little explored. This excellent and agenda-setting volume provides a ground-breaking look at a range of artistic practices, and the ways in which they have attempted to support peacebuilding – a must-read for all practitioners and policy-makers, and indeed other peace-makers looking for inspiration."Professor Christine Bell, FBA, Professor of Constitutional Law, Assistant Principal (Global Justice), and co-director of the Global Justice Academy, The University of Edinburgh, UK "Peacebuilding and the Arts offers an impressive and impressively comprehensive engagement with the role that visual art, music, literature, film and theatre play in building peaceful and just societies. Without idealizing the role of the arts, the authors explore their potential and limits in a wide range of cases, from Korea, Cambodia, Colombia and Northern Ireland to Uganda, Rwanda, South Africa and Israel-Palestine."Roland Bleiker, Professor of International Relations, University of Queensland, Australia, and author of Aesthetics and World Politics and Visual Global Politics "Peacebuilding and the Arts is the first publication to focus critically and comprehensively on the relations between the creative arts and peacebuilding, expanding the conventional boundaries of peacebuilding and conflict transformation to include the artist, actor, poet, novelist, dramatist, musician, dancer and film director. The sections on the visual arts, music, literature, film and theatre, include case studies from very different cultures, contexts and settings but a central theme is that the creative arts can play a unique and crucial role in the building of peaceful and just societies, with the power to transform relationships, heal wounds, and nurture compassion and empathy. Peacebuilding and the Arts is a vital and unique resource which will stimulate critical discussion and further research, but it will also help to refine and reframe our understanding of peacebuilding. While it will undoubtedly become mandatory reading for students of peacebuilding and the arts, its original approach and dynamic exploratory style should attract a much wider interdisciplinary audience."Professor Anna King, Professor of Religious Studies and Social Anthropology and Director of Research, Centre of Religion, Reconciliation and Peace (WCRRP), University of Winchester, UK This volume explores the relationship between peacebuilding and the arts. Through a series of original essays, authors consider some of the ways that different art forms (including film, theatre, music, literature, dance, and other forms of visual art) can contribute to the processes and practices of building peace. This book breaks new ground, by setting out fresh ways of analysing the relationship between peacebuilding and the arts. Divided into five sections on the Visual Arts, Music, Literature, Film and Theatre/Dance, over 20 authors offer conceptual overviews of each art form as well as new case studies from around the globe and critical reflections on how the arts can contribute to peacebuilding. As interest in the topic increases, no other book approaches this complex relationship in the way that Peacebuilding and the Arts does. By bringing together the insights of scholars and practitioners working at the intersection of the arts and peacebuilding, this book develops a series of unique, critical perspectives on the interaction of diverse art forms with a range of peacebuilding endeavours.

Working Backwards Colin Bryar 2021-02-09 Working Backwards is an insider's breakdown of Amazon's approach to culture, leadership, and best practices from two long-time Amazon executives—with lessons and techniques you can apply to your own company, and career, right now. In Working Backwards, two long-serving Amazon executives reveal the principles and practices that have driven the success of one of the most extraordinary companies the world has ever known. With twenty-seven years of Amazon experience between them—much of it during the period of unmatched innovation that created products and services including Kindle, Amazon Prime, Amazon Studios, and Amazon Web Services—Bryar and Carr offer unprecedented access to the Amazon way as it was developed and proven to be repeatable, scalable, and adaptable. With keen analysis and practical steps for applying it at your own company—no matter the size—the authors illuminate how Amazon's fourteen leadership principles inform decision-making at all levels of the company. With a focus on customer obsession, long-term thinking, eagerness to invent, and operational excellence, Amazon's ground-level practices ensure these characteristics are translated into action and flow through all aspects of the business. Working Backwards is both a practical guidebook and the story of how the company grew to become so successful. It is filled with the authors' in-the-room recollections of what "Being Amazonian" is like and how their time at the company affected their personal and professional lives. They demonstrate that success on Amazon's scale is not achieved by the genius of any single leader, but rather through commitment to and execution of a set of well-defined, rigorously-executed principles and practices—shared here for the very first time. Whatever your talent, career or organization might be, find out how you can put Working Backwards to work for you.

International Yearbook for Research in Arts Education 2/2014 Larry O'Farrell 2014 Building on earlier discourse, the current yearbook volume continues to focus on questions of research in the field of cultural and arts education from a global perspective. This year's volume opens with a review of important contributions to the World Summit in Arts Education held in Wildbad Kreuth, Germany in 2013. It continues with the topics of evaluation, mapping and monitoring introduced in the first volume. Theoretical and practical applications of the key foundations of work in the International Network for Research in Arts Education (INRAE) are also explored at length. Most notably, new approaches aimed at linking arts education to peace education and the application of these approaches to education for sustainable development (ESD) are introduced and explored.

Mapping Intermediality in Performance Sarah Bay-Cheng 2010 This insightful book explores the relationship between theater and digital culture. The authors show that the marriage of traditional performance with new technologies leads to an upheaval of the implicit "live" quality of theatre by introducing media interfaces and Internet protocols, all the while blurring the barriers between theater-makers and their audience.

Bridging Cultural Conflicts Michelle LeBaron 2003-04-21 In this ground-breaking book the author uses her unique experience and vast knowledge of psychology, multicultural dispute resolution and international jurisprudence to present a very human but also practical approach to dealing with conflicts on a personal, business and political level - local, regional, or transboundary. **Cultural Contestation in Ethnic Conflict** Marc Howard Ross 2007-05-03 Ethnic conflict often focuses on culturally charged symbols and rituals that evoke strong emotions from all sides. Marc Howard Ross examines battles over diverse cultural expressions, including Islamic headscarves in France, parades in Northern Ireland, holy sites in Jerusalem and Confederate flags in the American South to propose a psychocultural framework for understanding ethnic conflict, as well as barriers to, and opportunities for, its mitigation. His analysis explores how culture frames interests, structures demand-making and shapes how opponents can find common ground to produce constructive outcomes to long-term disputes. He focuses on participants' accounts of conflict to identify emotionally significant issues, and the power of cultural expressions to link individuals to larger identities and shape action. Ross shows that, contrary to popular belief, culture does not necessarily exacerbate conflict; rather, the constructed nature of psychocultural narratives can facilitate successful conflict mitigation through the development of more inclusive narratives and identities.

Joseph Pine 1999 Future economic growth lies in the value of experiences and transformations—good and services are no longer enough. We are on the threshold, say authors Pine and Gilmore, of the Experience Economy, a new economic era in which all businesses must orchestrate memorable events for their customers. The Experience Economy offers a creative, highly original, and yet eminently practical strategy for companies to script and stage the experiences that will transform the value of what they produce. From America Online to Walt Disney, the authors draw from a rich and varied mix of examples that showcase businesses in the midst of creating personal experiences for both consumers and businesses. The authors urge managers to look beyond traditional pricing factors like time and cost, and consider charging for the value of the transformation that an experience offers. Goods and services, say Pine and Gilmore, are no longer enough. Experiences and transformations are the basis for future economic growth, and The Experience Economy is the script from which managers can begin to direct their own transformations.

The Palgrave Handbook of Disciplinary and Regional Approaches to Peace Oliver Richmond 2016-03-15 In this handbook, a diverse range of leading scholars consider the social, cultural, economic, political, and developmental underpinnings of peace. This handbook is a much-needed response to the failures of contemporary peacebuilding missions and narrow disciplinary debates, both of which have outlined the need for more interdisciplinary work in International Relations and Peace and Conflict studies. Scholars, students, and policymakers are often disillusioned with universalist and northern-dominated approaches, and a better understanding of the variations of peace and its building blocks, across different regions, is required. Collectively, these chapters promote a more differentiated notion of peace, employing comparative analysis to explain how peace is debated and contested.

Handbook of Research on Promoting Peace Through Practice, Academia, and the Arts Lutfy, Mohamed Walid 2018-09-07 Academic disciplines perceive tranquility and a sense of contentment differently among themselves and therefore contribute to peace-building initiatives differently. Peace is not merely a function of education or a tool that produces amicable systems, but rather a concept that educational contributions can help societies progress to a more peaceful existence. The Handbook of Research on Promoting Peace Through Practice, Academia, and the Arts aims to provide readers with a concise overview of proactive positive peace models and practices to counter the overemphasis on merely ending wars as a solution. While approaching peace-building through multiple vantage points and academic fields such as the humanities, arts, social sciences, and theology, this valuable resource promotes peace-building as a cooperative effort. This publication is a vital reference work for humanitarian workers, leaders, educators, policymakers, academicians, undergraduate and graduate-level students, and researchers.

Global Business Driven HR Transformation: The Journey Continues (Print Edition) Deloitte & Touche

No Rules Rules Reed Hastings 2020-09-08 The New York Times bestseller Shortlisted for the 2020 Financial Times & McKinsey Business Book of the Year Netflix cofounder Reed Hastings reveals for the first time the unorthodox culture behind one of the world's most innovative, imaginative, and successful companies There has never before been a company like Netflix. It has led nothing short of a revolution in the entertainment industries, generating billions of dollars in annual revenue while capturing the imaginations of hundreds of millions of people in over 190 countries. But to reach these great heights, Netflix, which launched in 1998 as an online DVD rental service, has had to reinvent itself over and over again. This type of unprecedented flexibility would have been impossible without the counterintuitive and radical management principles that cofounder Reed Hastings established from the very beginning. Hastings rejected the conventional wisdom under which other companies operate and defied tradition to instead build a culture focused on freedom and responsibility, one that has allowed Netflix to adapt and innovate as the needs of its members and the world have simultaneously transformed. Hastings set new standards, valuing people over process, emphasizing innovation over efficiency, and giving employees context, not controls. At Netflix, there are no vacation or expense policies. At Netflix, adequate performance gets a generous severance, and hard work is irrelevant. At Netflix, you don't try to please your boss, you give candid feedback instead. At Netflix, employees don't need approval, and the company pays top of market. When Hastings and his team first devised these unorthodox principles, the implications were unknown and untested. But in just a short period, their methods led to unparalleled speed and boldness, as Netflix quickly became one of the most loved brands in the world. Here for the first time, Hastings and Erin Meyer, bestselling author of The Culture Map and one of the world's most influential business thinkers, dive deeply into the controversial ideologies at the heart of the Netflix psyche, which have generated results that are the envy of the business world. Drawing on

hundreds of interviews with current and past Netflix employees from around the globe and never-before-told stories of trial and error from Hastings’s own career, No Rules Rules is the fascinating and untold account of the philosophy behind one of the world’s most innovative, imaginative, and successful companies.

Leading Digital George Westerman 2014-09-23 Become a Digital Master—No Matter What Business You’re In If you think the phrase “going digital” is only relevant for industries like tech, media, and entertainment—think again. In fact, mobile, analytics, social media, sensors, and cloud computing have already fundamentally changed the entire business landscape as we know it—including your industry. The problem is that most accounts of digital in business focus on Silicon Valley stars and tech start-ups. But what about the other 90-plus percent of the economy? In *Leading Digital*, authors George Westerman, Didier Bonnet, and Andrew McAfee highlight how large companies in traditional industries—from finance to manufacturing to pharmaceuticals—are using digital to gain strategic advantage. They illuminate the principles and practices that lead to successful digital transformation. Based on a study of more than four hundred global firms, including Asian Paints, Burberry, Caesars Entertainment, Codelco, Lloyds Banking Group, Nike, and Pernod Ricard, the book shows what it takes to become a Digital Master. It explains successful transformation in a clear, two-part framework: where to invest in digital capabilities, and how to lead the transformation. Within these parts, you’ll learn: • How to engage better with your customers • How to digitally enhance operations • How to create a digital vision • How to govern your digital activities The book also includes an extensive step-by-step transformation playbook for leaders to follow. *Leading Digital* is the must-have guide to help your organization survive and thrive in the new, digitally powered, global economy.

The Actor and the Character Vladimir Mirodan 2018-11-12 Transformative acting remains the aspiration of many an emerging actor, and constitutes the achievement of some of the most acclaimed performances of our age: Daniel Day-Lewis as Lincoln, Meryl Streep as Mrs Thatcher, Anthony Hopkins as Hannibal Lecter – the list is extensive, and we all have our favourites. But what are the physical and psychological processes which enable actors to create characters so different from themselves? To understand this unique phenomenon, Vladimir Mirodan provides both a historical overview of the evolution of notions of 'character' in Western theatre and a stunning contemporary analysis of the theoretical implications of transformative acting. *The Actor and the Character: Surveys the main debates surrounding the concept of dramatic character and – contrary to recent trends – explains why transformative actors conceive their characters as 'independent' of their own personalities. Describes some important techniques used by actors to construct their characters by physical means: work on objects, neutral and character masks, Laban movement analysis, Viewpoints, etc. Examines the psychology behind transformative acting from the perspectives of both psychoanalysis and scientific psychology and, based on recent developments in psychology, asks whether transformation is not just acting folklore but may actually entail temporary changes to the brain structures of the actors. The Actor and the Character speaks not only to academics and students studying actor training and acting theory, but contributes to current lively academic debates around character. This is a compelling and original exploration of the limits of acting theory and practice, psychology, and creative work, in which Mirodan boldly re-examines some of the fundamental assumptions of actor training and some basic tenets of theatre practice to ask: What happens when one of us 'becomes somebody else'?*

Communication in Peacebuilding Stefanie Pukallus 2021-12-19 This book is concerned with the role that communication - understood as including both the factual and fictional mass media as well as the

performative and visual arts - can play in post-civil war peacebuilding. It engages with questions of how a society can move from the civil war conditions of discursive dehumanisation to peaceful cooperation in post-civil war settings and how peacebuilders can help communities utilise the transformative capacity of communication to encourage the reimagining of and engagement with former enemies as co-citizens. Ultimately, civil and peaceful cooperation depends on the observance of discursive civility and the building of safe discursive spaces in which civil engagement between different groups of society (including former combatants and survivors) can safely take place. This book argues that understanding communicative peacebuilding in this way is fundamental to the achievement of self-sustainable everyday peace.

Ideological Battlegrounds Dana L. Solomon 2018-12-04 With ideological divisions polarizing society, this book introduces Ideologically Challenging Entertainment (ICE), which uses multiple perspectives to help audiences connect with those holding different world views. A case study of a production using the ICE model shows audiences responding with greater tolerance and acceptance of others.

Acting Together: Performance and the Creative Transformation of Conflict Cynthia Cohen 2011-12-27 *Acting Together* volume II continues where the first volume left off, presenting more inspiring examples of peacebuilding performances in conflict-ridden regions. Where the first volume emphasizes theater and ritual's potential for resistance and catharsis in the midst of direct violence and in the aftermath of mass violence, the second volume focuses on performance's ability to bridge gaps and create inclusion in the more subtle context of structural violence and social exclusion. Drawing examples from the Americas, Africa, Asia, and Europe, this volume also includes practical recommendations for policy makers, a toolkit for practitioners, and a wealth of resources for artists and educators.

Acting Together I: Performance and the Creative Transformation of Conflict Cynthia Cohen 2011-07-22 Describes peacebuilding performances in different regions of the world fractured by war and violence.

Worldmaking Dorinne Kondo 2018-12-24 In this bold, innovative work, Dorinne Kondo theorizes the racialized structures of inequality that pervade theater and the arts. Grounded in twenty years of fieldwork as dramaturg and playwright, Kondo mobilizes critical race studies, affect theory, psychoanalysis, and dramatic writing to trenchantly analyze theater's work of creativity as theory: acting, writing, dramaturgy. Race-making occurs backstage in the creative process and through economic forces, institutional hierarchies, hiring practices, ideologies of artistic transcendence, and aesthetic form. For audiences, the arts produce racial affect--structurally over-determined ways affect can enhance or diminish life. Upending genre through scholarly interpretation, vivid vignettes, and Kondo's original play, *Worldmaking* journeys from an initial romance with theater that is shattered by encounters with racism, toward what Kondo calls reparative creativity in the work of minoritarian artists Anna Deavere Smith, David Henry Hwang, and the author herself. *Worldmaking* performs the potential for the arts to remake worlds, from theater worlds to psychic worlds to worldmaking visions for social transformation.

Theatre for Peacebuilding Nilanjana Premaratna 2018-05-05 This book contributes to key debates in peacebuilding by exploring the role of theatre and art in general. Premaratna argues that the dialogical and multi-voiced nature of theatre is particularly suited to assisting societies coming to terms with conflict and opening up possibilities for conversation. These are important parts of the peacebuilding process. The book engages the conceptual links between theatre and peacebuilding and then offers an in-depth empirical exploration of how three South Asian theatre groups approach peacebuilding: Jana Karaliya in Sri Lanka, Jana Sanskriti in India, and Sarwanam in Nepal. The ensuing reflections offer insights that are relevant to both students and practitioners concerned with issues of peace and conflict.
