A New Companion to Homer Ian Morris 1997 This volume is the first English-language survey of Homeric studies to appear for more than a generation, and the first such work to attempt to cover all fields comprehensively. Thirty leading scholars from Europe and America provide short, authoritative overviews of the state of knowledge and current controversies in the many specialist divisions in Homeric studies. The chapters pay equal attention to literary, mythological,

linguistic, historical, and archaeological topics, ranging from such long-established problems as the "Homeric Question" to newer issues like the relevance of narratology and computer-assisted quantification. The collection, the third publication in Brill's handbook series, "The Classical Tradition," will be valuable at every level of study - from the general student of literature to the Homeric specialist seeking a general understanding of the latest developments across the whole range of Homeric scholarship. Nazim Ali 2021-11-30 Waqf is one of  
the most potent socio-economic tools  
for reducing public sector deficit  
and breaking the chain of  
intergenerational poverty. Providing  
a high-level discussion on waqf  
development and innovation within the  
context of modern socio-economic and  
legal developments, this book  
examines the importance and  
potentials of waqf and the issues  
relating to its legal and regulatory  
framework. The research delivers  
future directions for countries that  
plan to explore this socio-economic  
institution. Readers and policymakers  
will be able to replicate successful  
experiments and learn from some  
failed initiatives to seek  
alternative funding platforms to  
support the fiscal policies of  
developing countries. The volume  
discusses the relevance and novel  
application of waqf in the modern  
economic system and social  
development, it reviews applicable  
laws and regulations pertaining to  
waqf and trust laws and examines  
critical, cross-country case studies  
and experiences. Setting an agenda  
for further researchers in the field  
of waqf, this comprehensive high-  
level analysis, with case studies  
from leading jurisdictions across the  
world, is a key resource for  
researchers, policymakers and  
institutions interested in charitable  
endowments, Islamic finance, and  
social finance.

*Language Teaching and Learning*  
Debbita Tan Ai Lin 2014-06-19 In  
every discussion on the role that  
language plays in our lives, every  
orator – from prominent politicians  
and corporate figures to linguists,  
educational experts, and others –  
concedes that language is important  
in all spheres of life. Language is  
both personal and introspective, as  
well as public and communal. Without  
it, we would not be able to  
communicate and articulate our  
thoughts and feelings to ourselves,  
to those in our inner circles, and to  
those in the world at large. Without  
it, we would not be able to establish  
partnerships and collaborations, and  
to unite peoples of diverse  
backgrounds and intrinsic values.  
Without it, too, we would not be able  
to learn new discoveries and gain new  
knowledge. The nurturing of a  
language learning culture is of the  
utmost importance to ensure that  
language teaching and learning  
supports the development of  
individuals, societies, nations, and  
populations. Language researchers,  
educators, and practitioners need to  
ensure that their learners are  
empowered to remain relevant. They  
need to produce critical and  
analytical thinkers, and successful  
language users in listening,  
speaking, reading, and writing. The  
collection of chapters in this volume  
addresses language teaching and  
learning dilemmas and draws attention  
to the challenges researchers have  
overcome and those they continue to  
face. The book chapters here reflect  
the transcendence by language  
teaching and learning of ordinary  
boundaries, especially with the  
advent of the digital revolution, and  
provide new perspectives, pedagogies,  
and approaches that help shape  
ethical, responsible, and sustainable  
policies. Readers of this volume,

whether language practitioners, students, researchers, policy- and decision-makers, concerned educationists, or any interested individual, will gain new insights and experiences as they explore new identities, new instructional media for interactive teaching and learning and new modes of meaning in diverse local and global contexts.

Then their friends started joining in. First at the old burned-down Fear Mansion. Later at the local bar Nights. They called themselves the Night People. And they carefully protected their secret world. No parents, no work, no stress. Just chilling with friends in their own private after-hours club. But then the nights turned dark. Unexplainable accidents, evil pranks...and then, later, the killings. The Night People know they have to stop the horror all by themselves, or else they risk exposure -- not to mention their lives. Things go bump in the Night....

University league tables at national, regional, international levels are increasingly complex, influential and controversial. In spite of criticisms on robustness of methodology and bias of indicators, higher education institutions continue to have an appetite for them and use or misuse them in their planning, policymaking and promotion activities. This publication will contribute to the much needed analysis of the implications, benefits and unintended consequences related to rankings and the broader issues of quality assurance in the Asia Pacific region. *The Practical Standard Dictionary of the English Language* 1922

Stereotypes and Language Learning Motivation Larisa Nikitina 2020-04-28

This book explores stereotypes that learners of six Asian languages—Japanese, Mandarin, Korean, Myanmar, Thai and Vietnamese—hold about the target language country, its cultures and people. Some of the findings, such as the language learners' mental images of Myanmar, Thailand and Vietnam, are presented here for the first time. Recognizing that stereotypes, and attitudes embedded in them, have an impact on people's actions and behavioural intentions, this book examines whether and how the country stereotypes held by the students influenced their motivation to learn the target language. Besides providing worthwhile insights into the content and structure of the country stereotypes and their relationship with language learning motivation, this book offers methodological and theoretical advancements. Drawing on intellectual heritage of Russian psychologist Lev Vygotsky (1896-1934) the book highlights how the concepts of word meaning (znachenie slova) and word sense (smysl) could be fruitfully employed in studies on stereotypes that people learning a foreign

language hold about a target language country. This book will appeal to all readers interested in stereotypes

that people have about foreign countries and also to educators and researchers who study language learning motivation.
