UnSelling Scott Stratten 2014-09-29 UnSelling is about everything but the sell. We put all of our focus on the individual purchase transaction, while putting the rest of our business actions second. We've become blind to customer service, support, branding, experiences and even product quality. Sixty percent of a purchasing decision is made before a customer even contacts you. We have funnel vision, and it needs to stop. Unselling is about the big picture: creating repeat customers, not one-time buyers. Create loyal clients that refer others, not faceless numbers. Becoming the go-to company

for something, before they even need you. You don't need social media, but you can be connecting with your clients socially. Your video doesn't have to be viral in front of a million people, just contagious in front of your specific market. Content, connection, engagement. It's time to separate from the pack of noise. It's time to UnSell.

The Internal Auditing Handbook K. H. Spencer Pickett 2010-09-07 The first edition of The Internal Auditing Handbook received wide acclaim from readers and became established as one of the definitive publications on internal auditing. The second edition was released soon after to reflect the rapid progress of the internal audit profession. There have been a number of significant changes in the practice of internal auditing since publication of the second edition and this revised third edition reflects those changes. The third edition of The Internal Auditing Handbook retains all the detailed material that formed the basis of the second

edition and has been updated to reflect the Institute of Internal Auditor's (IIA) International Standards for the Professional Practice of Internal Auditing. Each chapter has a section on new developments to reflect changes that have occurred over the last few years. The key role of auditors in reviewing corporate governance and risk management is discussed in conjunction with the elevation of the status of the chief audit executive and heightened expectations from boards and audit committees. Another new feature is a series of multi-choice questions that have been developed and included at the end of each chapter. This edition of The Internal Auditing Handbook will prove to be an indispensable reference for both new and experienced auditors, as well as business managers, members of audit committees, control and compliance teams, and all those who may have an interest in promoting corporate governance.

Student Writing Theresa M. Lillis 2002-01-04

Student Writing presents an accessible and thought-provoking study of academic writing practices. Informed by 'composition' research from the US and 'academic literacies studies' from the UK, the book challenges current official discourse on writing as a 'skill'. Lillis argues for an approach which sees student writing as social practice. The book draws extensively on a three-year study with ten non-traditional students in higher education and their experience of academic writing. Using case study material - including literacy history interviews, extended discussions with students about their writing of discipline specific essays, and extracts from essays - Lillis identifies the following as three significant dimensions to academic writing: * Access to higher education and to its language and literacy representational resources * Regulation of meaning making in academic writing * Desire for participation in higher education and for choices over ways of meaning in academic writing. Student Writing: access,

regulation, desire raises questions about why academics write as they do, who benefits from such writing, which meanings are valued and how, on what terms 'outsiders' get to be 'insiders' and at what costs.

The Handbook of Groundwater Engineering

Jacques W. Delleur 2010-12-12 Due to the increasing demand for adequate water supply caused by the augmenting global population, groundwater production has acquired a new importance. In many areas, surface waters are not available in sufficient quantity or quality. Thus, an increasing demand for groundwater has resulted. However, the residence of time of groundwater can be of the order of thousands of years while surface waters is of the order of days. Therefore, substantially more attention is warranted for transport processes and pollution remediation in groundwater than for surface waters. Similarly, pollution remediation problems in groundwater are generally complex. This excellent, timely resource covers the field of

groundwater from an engineering perspective, comprehensively addressing the range of subjects related to subsurface hydrology. It provides a practical treatment of the flow of groundwater, the transport of substances, the construction of wells and well fields, the production of groundwater, and site characterization and remediation of groundwater pollution. No other reference specializes in groundwater engineering to such a broad range of subjects. Its use extends to: The engineer designing a well or well field The engineer designing or operating a landfill facility for municipal or hazardous wastes The hydrogeologist investigating a contaminant plume The engineer examining the remediation of a groundwater pollution problem The engineer or lawyer studying the laws and regulations related to groundwater quality The scientist analyzing the mechanics of solute transport The geohydrologist assessing the regional modeling of aquifers The geophysicist

Second Language Writing (Cambridge Applied Linguistics) Barbara Kroll 1990-10-26

The teaching of writing has become an area of increased interest and importance for teachers of second and foreign languages as well as educational researchers. This comprehensive collection covers the major issues writing teachers face in setting agendas for teaching writing to non-native speakers. The thirteen original articles, written by recognized scholars in the field, present original research studies, both qualitative and quantitative, and practical applications for the classroom teacher. The topics covered include the composing process of second language writers, variables in second

language writing performance, teacher response to student writing and student processing of feedback, writing assessment, and the reading/writing connection. The book further provides a historical view of the evolution in approaches to the teaching of second language writing and a coherent view of current approaches and issues. Second Language Writing is addressed to second and foreign language teachers, teachers in training, graduate students in education and applied linguistics, educational researchers, and other educators concerned with the teaching of writing.

Warm Beer, Lousy Food S. Columbia John S. Columbia 2009-12 The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They

were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

Modeling Groundwater Flow and Pollution

Jacob Bear 2012-12-06 Groundwater constitutes an important component of many water resource systems, supplying water for domestic use, for industry, and for agriculture. Management of a groundwater system, an aquifer, or a system of aquifers, means making such decisions as to the total quantity of water to be withdrawn annually, the location of wells for pumping and for artificial recharge and their rates, and control conditions at aquifer boundaries. Not less important are decisions related to groundwater qUality. In fact, the quantity and quality problems cannot be separated. In many parts of the world, with the increased withdrawal of ground water, often beyond permissible limits, the quality of groundwater has been continuously deteriorating, causing much concern to both suppliers and users. In recent years, in addition to general groundwater quality

aspects, public attention has been focused on groundwater contamination by hazardous industrial wastes, by leachate from landfills, by oil spills, and by agricultural activities such as the use of fertilizers, pesticides, and herbicides, and by radioactive waste in repositories located in deep geological formations, to mention some of the most acute contamination sources. In all these cases, management means making decisions to achieve goals without violating specified constraints. In order to enable the planner, or the decision maker, to compare alternative modes of action and to ensure that the constraints are not violated, a tool is needed that will provide information about the response of the system (the aquifer) to various alternatives.

Journalism and Politics in Indonesia David T. Hill
2010-01-21 Mochtar Lubis was one of Indonesia's best-known newspaper editors, authors and cultural figures, with a national, regional and international prominence that he

retained from the early 1950s until his recent death in 2004. This book traces the major events in the life of Mochtar Lubis, which is also a prism through which much of Indonesia's post-independence history can be interpreted. This book is also the story of Indonesia in the second half of the twentieth century, when the people of the archipelago became an independent nation, and when print media and the influential figures who controlled and produced newspapers, played a pivotal role in national political, educational and cultural life, defining Indonesia. Editors with strong personalities dominated the industry and sparred with the nation's leadership; Lubis was a vocal critic of the abuse of power and a thorn in the side of the country's first two presidents, becoming synonymous with combative journalism. Under both Sukarno and Suharto, Lubis had his newspaper closed down and was imprisoned. As the only comprehensive biography of this towering figure, the book provides a unique insight into the history and

development of media, literature and the political system in Indonesia.

Evidence-Based Policymaking Karen

Bogensneider 2021-04-27 New thinking is needed on the age-old conundrum of how to connect research and policymaking. Why does a disconnect exist between the research community, which is producing thousands of studies relevant to public policy, and the policy community, which is making thousands of decisions that would benefit from research evidence? The second edition updates community dissonance theory and provides an even stronger, more substantiated story of why research is underutilized in policymaking, and what it will take to connect researchers and

policymakers. This book offers a fresh look into what policymakers and the policy process are like, as told by policymakers themselves and the researchers who study and work with them. New to the second edition: • The point of view of policymakers is infused throughout this book based on a remarkable new study of 225 state legislators with an extraordinarily high response rate in this hard-to-access population. • A new theory holds promise for guiding the study and practice of evidence-based policy by building on how policymakers say research contributes to policymaking. • A new chapter features pioneering researchers who have effectively influenced public policy by engaging policymakers in ways rewarding to both. • A new chapter proposes how an engaged university could provide culturally competent training to create a new type of scholar and scholarship. This review of state-of-the-art research on evidence-based policy is a benefit to readers who find it hard to keep abreast of a field that spans

the disciplines of business, economics, education, family sciences, health services, political science, psychology, public administration, social work, sociology, and so forth. For those who study evidence-based policy, the book provides the basics of producing policy relevant research by introducing researchers to policymakers and the policy process. Strategies are provided for identifying research questions that are relevant to the societal problems that confront and confound policymakers. Researchers will have at their fingertips a breath-taking overview of classic and cutting-edge studies on the multi-disciplinary field of evidence-based policy. For instructors, the book is written in a language and style that students find engaging. A topic that many students find mundane becomes germane when they read stories of what policymakers are like, and when they learn of researcher's tribulations and triumphs as they work to build evidence-based policy. To point

students to the most important ideas, the key concepts are highlighted in text boxes. For those who desire to engage policymakers, a new chapter summarizes the breakthroughs of several researchers who have been successful at driving policy change. The book provides 12 innovative best practices drawn from the science and practice of engaging policymakers, including insights from some of the best and brightest researchers and science communicators. The book also takes on the daunting task of evaluating the effectiveness of efforts to engage policymakers around research. A theory of change identifies seven key elements that are fundamental to increasing policymaker's use of research along with evaluation protocols and preliminary evidence on each element.
