Digital Cinematography David Stump, ASC

2021-11-19 Today's successful cinematographer must be equal parts artist, technician, and business-person. The cinematographer needs to master the arts of lighting, composition, framing and other aesthetic considerations, as well as the technology of digital cameras, recorders, and workflows, and must know how to choose the right tools (within their budget) to get the job done. David Stump's Digital Cinematography focuses on the tools and technology of the trade, looking at how digital cameras work, the ramifications of choosing one camera versus another, and how those choices help creative cinematographers to tell a story. This book empowers the reader to correctly choose the appropriate camera and workflow for their project

from today's incredibly varied options, as well as understand the ins and outs of implementing those options. Veteran ASC cinematographer David Stump has updated this edition with the latest technology for cameras, lenses, and recorders, as well as included a new section on future cinematographic trends. Ideal for advanced cinematography students as well as working professionals looking for a resource to stay on top of the latest trends, this book is a must read.

Water-resources Engineering David A. Chin 2006
This in-depth review of water-resources engineering essentials focuses on both fundamentals and design applications. Emphasis on fundamentals encourages readers' understanding of basic equations in water-resources engineering and the background that is necessary to develop innovative solutions to complex problems. Comprehensive design applications illustrate the practical application of the basic equations of water-resources

engineering. Full coverage of hydraulics, hydrology, and water-resources planning and management is provided. Hydraulics is separated into closed-conduit flow and open-channel flow, and hydrology is separated into surface-water hydrology and ground-water hydrology. For professionals looking for a reference book on water-resources engineering.

SEER, Surveillance, Epidemiology, and End Results Program SEER Program (National Cancer Institute (U.S.)) 2000

SEER Summary Staging Manual 2000 National Cancer Institute (U.S.). Cancer Statistics Branch 2001-10 From the *Surveill., Epidem., & End Results (SEER) Prog.* based at the Nat. Cancer Inst. Intended as a coding manual beginning with cases diagnosed from Jan. 1, 2001 rather than a staging guide. Each anatomic site in the Topography Sect. of the *Internat. Class. of Disease for Oncology -- 3rd Ed. (ICD-0-3)* has a corresponding summary staging scheme. Certain specific histologic types also have specific staging schemes. In some cases, sites which previously had separate guides (such as the segments of the colon) have a single staging scheme (colon), whereas some sites which previously had a single guide (e.g., larynx) have separate schemes for each sub-site of the larynx.

Diseases of Swine Jeffrey J. Zimmerman

2019-03-25 Provides a fully revised Eleventh Edition of the definitive reference to swine health and disease *Diseases of Swine* has been the definitive reference on swine health and disease for over 60 years. This new edition has been completely revised to include the latest information, developments, and research in the field. Now with full color images throughout, this comprehensive and authoritative resource has been redesigned for improved consistency and readability, with a reorganized format for more intuitive access to information. *Diseases of Swine* covers a wide range of essential topics on swine production, health, and management, with contributions from more than 100 of the foremost international experts in the field. This revised edition makes the information easy to find and includes expanded information on welfare and behavior. A key reference for anyone involved in the swine industry, *Diseases of Swine, Eleventh Edition*: Presents a thorough revision to the gold-standard reference on pig health and disease Features full color images throughout the book

Includes information on the most current advances in the field Provides comprehensive information on swine welfare and behavior Offers a reorganized format to make the information more accessible Written for veterinarians, academicians, students, and individuals and agencies responsible for swine health and public health, *Diseases of Swine*, Eleventh Edition is an essential guide to swine health.

Sentinel Lymph Node Biopsy Hiram S. Cody 2001-11-08 An intuitive, ingenious and powerful technique, sentinel lymph node biopsy has entered clinical practice with astonishing rapidity and now represents a new standard of care for melanoma and breast cancer patients, while showing great promise for the treatment of urologic, colorectal, gynecologic, and head and neck cancers. This text, written by international experts in the technique, provides a clear and comprehensive guide, presenting a detailed overview and discussing the various mapping techniques available and how these are applied in a number of leading institutions. This essential resource for surgical oncologists, pathologists, and specialists in nuclear medicine will also provide key information for those planning to start a sentinel lymph node program.

Operational Amplifiers Johan Huijsing 2016-07-09

This proven textbook guides readers to a thorough understanding of the theory and design of operational amplifiers (OpAmps). The core of the book presents systematically the design of operational amplifiers, classifying them into a periodic system of nine main overall configurations, ranging from one gain stage up to four or more stages. This division enables circuit designers to recognize quickly, understand, and choose optimal configurations. Characterization of operational amplifiers is given by macro models and error matrices, together with measurement techniques for their parameters. Definitions are given for four types of operational amplifiers depending on the grounding of their input and output ports. Many famous designs are evaluated in depth, using a carefully structured approach enhanced by numerous figures. In order to reinforce the concepts introduced and facilitate self-evaluation of design skills, the author includes problems with detailed solutions, as well as simulation exercises.

The Archaeology of Power John Steane 2001 A groundbreaking study detailing what archaeology can tell us about the middle-ages. The study of government in Britain and North-West Europe during the middle ages has traditionally been the monopoly of historians. In this remarkable book the author shows what archaeology can contribute to the overall picture of medieval society. In particular he looks at two areas: the objects, such as costume, crowns, thrones and sceptres which were vital symbolic elements in complex liturgical and ideological systems and the buildings, palaces, castles, monasteries which were created by powerful elites and provided the space within which symbolic functions were played out.

Sober Curious Ruby Warrington 2018-12-31

Would life be better without alcohol? It's the nagging question more and more of us are finding harder to ignore, whether we have a "problem" with alcohol or not. After all, we yoga. We green juice. We meditate. We self-care. And yet, come the end of a long work day, the start of a weekend, an awkward social situation, we drink. One glass of wine turns into two turns into a bottle. In the face of how we care for ourselves otherwise, it's hard to avoid how alcohol really

makes us feel... terrible. How different would our lives be if we stopped drinking on autopilot? If we stopped drinking altogether? Really different, it turns out. Really better. Frank, funny, and always judgment free, Sober Curious is a bold guide to choosing to live hangover-free, from Ruby Warrington, one of the leading voices of the new sobriety movement. Drawing on research, expert interviews, and personal narrative, Sober Curious is a radical take down of the myths that keep so many of us drinking. Inspiring, timely, and blame free, Sober Curious is both conversation starter and handbook—essential reading that empowers readers to transform their relationship with alcohol, so we can lead our most fulfilling lives.

Pipelines in the Constructed Environment
American Society of Civil Engineers. Pipeline Division. Conference 1998 New pipeline construction, the maintenance of existing pipelines, and the rehabilitation or replacement or deteriorating pipelines often takes place with many challenges and constraints imposed by developmental regulations. The 1998 Pipeline Division Conference provided a forum for those involved in the field to share ideas and learn more about the issues faced today. These 92 peer-reviewed papers reflect the current methods and technology in the field of pipeline construction. Proceedings of the 1998 Pipeline Division Conference, August '98, San Diego, CA.
