Last Night I Dreamt I Was a DJ Frank Baez 2014-11-20 Miami, FL's Jai-Alai Books proudly presents, *Last Night I Dreamt I Was a DJ* (2014), Frank Bez's debut volume of poetry in English, translated by P. Scott Cunningham and Hoyt Rogers. A former resident of Chicago, Bez's poetry highlights the deep connections between the United States and the Dominican Republic. He celebrates the lyrical possibilities of Santo Domingo, while also lamenting its systemic failures. He delights in the cultural influence of the United States, while also recognizing the failed exportation of the American dream. Most of all, though, Bez's poems are funny. They laugh at the spectacle of their creator and his struggle to exist as a poet in world hostile to poetry, and they dare to talk back to capitalism with the voices of the voiceless: the poor, working class people haunting the streets of Santo Domingo "like a new Night of the Living Dead sequel."

Extreme Economies Richard Davies 2020-07-20 To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, *Extreme Economies* turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

The Man on the Grassy Knoll John R. Craig 1992 A look at the assassination of John F. Kennedy offers evidence that places Charles Rogers--a psychopath wanted for the murder and dismemberment of his parents in 1965--at the site of the crime. Original.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Hav Jan Morris 2011-08-30 A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters* from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav* of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Care and the City Angelika Gabauer 2021-10-24 "Care and the City is a cross-disciplinary collection of chapters examining urban social spaces, in which caring and uncaring practices intersect and shape people's everyday lives. While asking how care and uncaring are embedded in the urban condition, the book focuses on inequalities in caring relations and the ways they are acknowledged, reproduced, and overcome in various spaces, discourses, and practices. This book provides a pathway for urban scholars to start engaging with approaches to conceptualize care in the city through a critical-reflexive analysis of processes of urbanization. It pursues a systematic integration of empirical, methodological, theoretical, and ethical approaches to care in urban studies, while overcoming a crisis-centered reading of care, and the related ambivalences in care debates, practices, and spaces. These strands are elaborated via a conceptual framework of care and situated within broader theoretical debates on cities, urbanization, and urban development with detailed case studies from Europe, the Americas, and Asia. By establishing links to various fields of knowledge, this book seeks to systematically introduce debates on care to the interconnecting fields of urban studies, planning theory, and related disciplines for the first time"--

Advanced Imaging Modalities Steffen Rickes 2004-01-01 Imaging technologies are the cornerstone in the diagnosis and staging of benign and malignant lesions in the liver and pancreas. Although the methods are partly competing, they often need to be used in a complementary way in order to obtain optimal results for decision making. The introduction of new and refined non-invasive imaging technologies has lately led to a major progress in the diagnostic approach to diseases of the digestive system. For example, this is the case with echo-enhanced sonography: This technique is based on the property of microbubbles to resonate and emit harmonic waves in an ultrasound field. The initial method, defined as 'second harmonic imaging', was limited by the incapacity to separate the signals obtained from the bubbles and the tissue texture. This procedure has been replaced by the pulse inversion imaging technique which now gives a much better picture quality, allowing to depict the vascularization pattern of distinct lesions in the liver and pancreas. Similarly, the performance of other key imaging modalities such as CT-scan, magnetic resonance imaging, Doppler sonography and endosonography has been improved. Clinicians seeking current information on modern imaging modalities for diagnosis, differentiation and staging of gastrointestinal diseases will find this publication very useful.

Yvain Chretien de Troyes 1987-09-10 The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

Can Christianity Cure Obsessive-Compulsive Disorder? Ian Osborn 2008-04-01 Obsessive-compulsive disorder (OCD) is a relentless condition, the primary symptom being the occurrence of terrifying ideas, images, and urges that jump into a person's mind and return again and again, despite the individual's attempt to remove them. Christians who suffer from OCD may grapple with additional guilt, as the undesired thoughts are frequently of a spiritual nature. Yet people may be surprised to learn that some of the greatest leaders in Christian history also struggled with this malady. What did they experience? How did they cope? Were they able to overcome these tormenting, often violent, obsessions? Where did God fit into the picture? Ian Osborn shares the personal accounts of Martin Luther, John Bunyan, and Saint Thérèse of Lisieux, as well as his own story, in exploring how faith and science work together to address this complex issue.
