Muslim Minority Higher Education Institutions in a Northern Indian Province Gulnaz Khan

2020-09-29 This book details an intensive case study of an Indian state that is more or less representative of the Muslim minorities in the country as a whole. The northern Indian province under study has a fair amount of Muslim population with a good number of educational institutions at different levels and grades. These institutions provide both traditional and modern education, which highlights the delicacies of the problems faced when promoting higher education in a comprehensive and inclusive way. This book is a detailed investigation based on a case study and surveys and interaction with many stakeholders including students, teachers and principals. The findings presented here will be useful in reshaping and revamping minority higher education plans in India, as well as policies related to these institutions.

The Psychology of the Social Uwe Flick 1998-08-20 The differences between individual and collective representations have occupied social scientists since Durkheim, and the social psychological theory of social representations has been one of the most influential theories in twentieth-century social science. The Psychology of the Social brings together leading scholars from social representations, discourse analysis and related approaches to provide an integrated overview of contemporary psychology's understanding of the social. Each chapter comprises a study of a topical issue, such as social memory, the language of racism, intelligence or representations of the self in different cultures; the theory of social representations is both exemplified and linked to central concerns of psychological research, including attribution, memory, and culture; and important links with developmental and educational psychology are made.

What is Clinical Psychology? Susan Llewelyn 2014-04-17 The number of people working in the field of clinical psychology has expanded significantly in recent years. The fifth edition of this very popular text has been extensively re-written and updated by two well respected editors who are closely connected with recent developments in the profession of clinical psychology. It includes sixteen chapters that cover all the major domains of clinical practice, from work in primary care or with children and families, to clinical psychology as it is practiced with those with severe and enduring mental health problems, and those with eating disorders, to the work of clinical psychologists in forensic settings or in leadership positions. It also includes recent innovations in service provision such the Improving Access to Psychological Therapies programme (IAPT). The book opens with an overview of professional practice and a clear introduction to the major competencies and theories used by practitioners, followed by a series of chapters that are authored by practising clinical psychologists who all have extensive experience in their specialist areas. These chapters effectively and vividly describe the application of the reflective scientist practitioner model of working. The book concludes with a wide-ranging consideration of likely future developments and challenges. The text also addresses key issues including ethics, diversity and team working. A key feature is the provision of a living sense of what the job entails, while an appendix provides guidance on training routes. This volume clearly demonstrates that clinical psychology is a highly effective profession, which applies understandings and findings from the discipline of psychology to clinical contexts in order to ameliorate people's distress and to support their wellbeing.

The Handbook of International Psychology Michael J. Stevens 2005-07-05 World events have raised pressing questions of psychology as it is practiced all over the globe. The Handbook of International Psychology chronicles the discipline of psychology as it evolves in different regions, in the hope of reducing the isolated, parochial, and ethnocentric nature of the American profession. It surveys the history, methodology, education and training, and the future of psychology in nine distinct regions across six continents. They represent long histories in the field, such as the United States and the United Kingdom, emerging practices, such as Uganda, Korea and Spain, the lesser-known philosophies of China and histories marked by massive social change, as in Poland and Iran. The editors have carefully selected contributors, as well as an editorial board created especially for this project. Each chapter follows a uniform outline, unifying the volume as a whole, but allowing for the cultural diversity and status of psychology in each country.

Memoirs of Three Continents Mirza Saeed-Uz Zafar Chaghtai 2015-10-20 Prof. Mirza Saeed-Uz Zafar Chaghtai is a renowned scholar, scientist and author of many books in various languages. He looks back at adventures that have spanned thousands of miles and included some of the world's most remarkable people. With candor and humor, he outlines his social, political, and religious beliefs and shares insights on scientific and literary life in India, Europe, the United States of America, and elsewhere. His rise to the top of the scholarly community began in a small town in British India and brought him to Paris, London, Sweden and various places throughout the world, where he shared ideas with distinguished scientists, Nobel laureates, men of letters and many exemplary people. From rural and feudal British India to pragmatic and modern Europe, he honed his understanding of the world and, at times, went through personal, social, political, religious, scientific, and literary upheavals before returning home enthused to work for his people as a scholar and scientist. Scholars, history buffs, and anyone eager to learn about people and places, especially India and Europe through the turn of the century, will be inspired and educated by *Memoirs of Three Continents*.

Emotions and Modernity in Colonial India Margrit Pernau 2019-08-22 With this pioneering project, Margrit Pernau brings the 'history of emotions' approach to South Asian studies. A theoretically sophisticated and erudite investigation, *Emotions and Modernity in Colonial India* maps the history of emotions in India between the uprising of 1857 and World War I. Situating the prevalent experiences, interpretations, and practices of emotions of the time within the context of the major political events of colonial India, Pernau goes beyond the dominant narrative of colonial modernity and its fixation with discipline and restraint, and traces the contemporary transformation from a balance in emotions to the resurgence of fervor. The current volume is based on a large archive of sources in Urdu, many being explored for the first time. Pernau grounds her work on such diverse sources as philosophical and theological treatises on questions of morality, advice literature, journals and newspapers, nostalgic descriptions of courtly culture, and even children's literature. This close look into individual experiences, practices, and interpretations reveals the myriad emotions of the day, and the importance of these micro-histories in presenting an alternative account of colonial India.

International Directory of Psychology Benjamin B. Wolman 2013-03-09 In the past several decades, psychology has grown so rapidly in many countries that no one has been able to keep up-to-date on more than a handful of countries. To be sure, the highly developed countries of North America, Western Europe, Japan, and Australia have generally had well-known national psychological societies for most of this century, and considerable information about their universities and institutes has been published at one time or another. But even in these more highly developed countries, the rapid changes of recent years are not well known. In any event, what information has been published is scattered so widely that it is hardly accessible when needed. Still less well known is the growth of psychology in the developing countries of Latin America, Asia, and Africa, and at least for Western readers, even the modern nations of Eastern Europe and the Soviet Union are relatively unknown. Only recently have most Western psychologists become aware of the fact that psychology as they know it is provincial. With more than half of the world's highly trained psychologists in Canada and the United States, which together devote far more of their national resources to psychological research than is true of any other countries in the world, it is not surprising that the North American journals, psychological associations, institutes, clinics, and other manifestations of psychology have completely dominated the field, at least until recently.

Social Psychology in Action Kai Sassenberg 2019-07-01 This timely and applied textbook brings together leading scientists to illustrate how key theories and concepts in social psychology help to predict and explain behavior, and can be successfully applied to benefit social and practical problems. It focuses on robust theories and models known for their successful applications and covers a diverse range of settings—spanning classroom interventions, health behavior, financial decision making, climate change and much more. Each chapter comprises of a theoretical section to define the key concepts and summarize the theory, providing evidence for its reliability and limitations from basic research, as well as an application section that summarizes research in an applied context and provides details about a particular study including the respective application setting. The textbook expertly shows how theory can make meaningful predictions for real world contexts, and isn't afraid to explain the potential hurdles and pitfalls when applying a theory and its underlying set of concepts in a certain context. Crucially, this format moves towards theory testing in applied contexts, enabling a closer examination of why and under what circumstances interventions may be successful in obtaining a desired behavioral or psychological end-state. Among the topics explored: Mindset theory of action phases and if-then planning Quality of motivation in self-determination theory The focus theory of normative conduct Social identity theory and intergroup contact theory Intergroup forgiveness Social Psychology in Action is a critical resource for advanced undergraduate and graduate students in social and cultural psychology, as well as students of behavioral economics seeking to develop a deeper understanding of major theories and applications of the fields. Practitioners working in the areas of organizational behavior and management, health communication, social work, and educational science and pedagogy will also find the volume pertinent to their work.

Print and the Urdu Public Megan Eaton Robb 2020-10-19 In early twentieth century British India, prior to the arrival of digital medias and after the rise of nationalist political movements, a small-town paper from the margins of society became a key player in Urdu journalism. Published in the isolated market town of Bijnor, Madinah grew to hold influence across North India and the Punjab while navigating complex issues of religious and political identity. In *Print and the Urdu Public*, Megan Robb uses the previously unexamined perspective of the Madinah to consider Urdu print publics and urban life in South Asia. Through a discursive and material analysis of Madinah, the book explores how Muslims who had settled in ancestral qasbahs, or small towns, used newspapers to facilitate a new public consciousness. The book demonstrates how Madinah connected the Urdu newspaper conversation both explicitly and implicitly with Muslim identity and delineated the boundaries of a Muslim public conversation in a way that emphasized rootedness to local politics and small urban spaces. The case study of this influential but understudied newspaper reveals how a network of journalists with substantial ties to qasbahs produced a discourse self-consciously alternative to the Western-influenced, secularized cities. Megan Robb augments the analysis with evidence from contemporary Urdu, English, and Hindi papers, government records, private diaries, private library holdings, ethnographic interviews, and training materials for newspaper printers. This thoroughly researched volume recovers the erasure of qasbah voices and proclaims the importance of space and time in definitions of the public sphere in South Asia. *Print and the Urdu Public* demonstrates how an Urdu newspaper published from the margins became central to the Muslim public constituted in the first half of

the twentieth century.

The Urdu Ghazal Gopi Chand Narang 2020-01-02 The Urdu Ghazal presents the unique flowering of the ghazal as a by-product of India's composite culture. It explores a variety of influences on the ghazal, including Sufism, Bhakti movement, and infusion of Rekhta and Persian languages and culture. The book elucidates classical ghazal forms that blossomed from the seeds sown by Amir Khusrau in the fourteenth century to achieve great heights of literary excellence during the next 300 years, notably in the works of great poets like Mir and Ghalib. It also illustrates different socio-political and cultural demands of changing times, primarily how the ghazal provided new creative models to deal with literary movements like progressivism, modernism, and postmodernism, through works of pioneering twentieth-century poets like Faiz Ahmed Faiz, Gulzar, and Javed Akhtar.

Language Teacher Psychology Sarah Mercer 2018-01-05 To date, the majority of work in language learning psychology has focused on the learner. In contrast, relatively little attention has been paid to teacher psychology. This volume seeks to redress the imbalance by bringing together various strands of research into the psychology of language teachers. It consists of 19 contributions on well-established areas of teacher psychology, as well as areas that have only recently begun to be explored. This original collection, which covers a multitude of theoretical and methodological perspectives, makes a significant contribution to the emerging field of language teacher psychology as a domain of inquiry within language education.

The Taliban's Virtual Emirate Neil Krishan Aggarwal 2016-05-24 Applying cutting-edge psychiatric theories to an analysis of online Taliban literature in four languages, Neil Krishan Aggarwal constructs a game-changing narrative of the organization's broad appeal and worldview. Aggarwal, a cultural psychiatrist, focuses on the Taliban's creation of culture, evoking religion in Arabic and English writings, nationalism in Dari sources, and regionalism in Urdu texts. The group also promotes a specific form of argumentation, citing religious scriptures in Arabic works, canonical poets in Dari and Urdu writings, and scholars and journalists in English publications. Aggarwal shows how the Taliban categorize all Muslims as members and all non-Muslims as outsiders; how they convince Muslims of the need for violence; and how they apply the insider/outsider dichotomy to foreign policy. By understanding these themes, Aggarwal argues, we can craft better countermessaging strategies.

Scripts and Literacy I. Taylor 2012-12-06 Literacy is a concern of all nations of the world, whether they be classified as developed or undeveloped. A person must be able to read and write in order to function adequately in society, and reading and writing require a script. But what kinds of scripts are in use today, and how do they influence the acquisition, use and spread of literacy? *Scripts and Literacy* is the first book to systematically explore how the nature of a script affects how it is read and how one learns to read and write it. It reveals the similarities underlying the world's scripts and the features that distinguish how they are read. Scholars from different parts of the world describe several different scripts, e.g. Japanese, Chinese, Korean, Indian Amerindian -- and how they are learned. Research data and theories are presented. This book should be of primary interest to educators and researchers in reading and writing around the world.
