For Clara Deverill, standing in for the real Lady Truelove means dispensing advice on problems she herself has never managed to overcome. There’s nothing for it but to retreat to a tearoom and hope inspiration strikes between scones. It doesn’t—until Clara overhears a rake waxing eloquent on the art of “honorable” jilting. The cad may look like an Adonis, but he’s about to find himself on the wrong side of Lady Truelove. Rex Galbraith is an heir with no plans to produce a spare. He flirts with the minimum number of eligible young ladies to humor his matchmaking aunt, but Clara is the first to ever catch his roving eye. When he realizes that Clara—as Lady Truelove—has used his advice as newspaper fodder, he’s infuriated. But when he’s forced into a secret alliance with her, he realizes he’s got a much bigger problem—because Clara is upending everything Rex thought he knew about women—and about himself. . . .

Left for Dead Pete Nelson 2002-05-14 For fans of sea battles, adventures, and war stories like Unbroken, this is the incredible true story of a boy who helps to bring closure to the survivors of the tragic sinking of the USS Indianapolis, and helps exonerate the ship's captain fifty years later. Hunter Scott first learned about the sinking of the USS Indianapolis by watching the movie Jaws when he was just eleven-years-old. This was fifty years after the ship had sunk, throwing more than 1,000 men into shark-infested waters—a long fifty years in which justice still had not been served. It was just after midnight on July 30, 1945 when the USS Indianapolis was torpedoed by a Japanese submarine. Those who survived the fiery sinking—some injured, many without life jackets—struggled to stay afloat as they waited for rescue. But the United States Navy did not even know they were missing. As time went on, the Navy needed a scapegoat for this disaster. So it court-martialed the captain for “hazarding” his ship. The survivors of the Indianapolis knew that their captain was not to blame. For fifty years they worked to clear his name, even after his untimely death. But the navy would not budge—not until Hunter entered the picture. His history fair project on the Indianapolis soon became a crusade to restore the captain's good name and the honor of the men who served under him. Law: A Very Short Introduction Raymond Wacks 2008-03-27 Law underlies our society - it protects our rights, imposes duties on each of us, and establishes a framework for the conduct of almost every social, political, and economic activity. The punishment of crime, compensation of the injured, and the enforcement of contracts are merely some of the tasks of a modern legal system. It also strives to achieve justice, promote freedom, and protect our security. The result is a system that, while it touches all of our daily lives, is properly understood by only a few, with its impenetrable jargon, obsolete procedures, and interminable stream of Byzantine statutes and judgments of the courts. This clear, jargon-free Very Short Introduction aims to redress that balance, as it introduces the essentials of law and legal systems in a lively, accessible, and stimulating manner. Explaining the main concepts, terms, and processes of the legal system, it focuses on the Western tradition (the common law and the civil law), but also includes discussions of other legal systems, such as customary law and Islamic law. And it looks to the future too, as globalization and rapid advances in technology place increasing strain on our current legal system. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Learning to Rank for Information Retrieval and Natural Language Processing, Second Edition Hang Li 2022-05-31 Learning to rank refers to machine learning techniques for training a model in a ranking task. Learning to rank is useful for many applications in information retrieval, natural language processing, and data mining. Intensive studies have been conducted on its problems recently, and significant progress has been made. This lecture gives an introduction to the area including the fundamental problems, major approaches, theories, applications, and future work. The author begins by showing that various ranking problems in information retrieval and natural language processing can be formalized as two basic ranking tasks, namely ranking creation (or simply ranking) and ranking aggregation. In ranking creation, given a request, one wants to generate a ranking list of offerings based on the features derived from the request and the offerings. In ranking aggregation, given a request, as well as a number of ranking lists of offerings, one wants to generate a new ranking list of the offerings. Ranking creation (or ranking) is the major problem in learning to rank. It is usually formalized as a supervised learning task. The author gives detailed explanations on learning for ranking creation and ranking aggregation, including training and testing, evaluation, feature creation, and major approaches. Many methods have been proposed for ranking creation. The methods can be categorized as the pointwise, pairwise, and listwise approaches according to the loss functions they employ. They can also be categorized according to the techniques they employ, such as the SVM based, Boosting based, and Neural Network based approaches. The author also introduces some popular learning to rank methods in details. These include: PRank, OC SVM, McRank, Ranking SVM, IR SVM, GBRank, RankNet, ListNet & ListMLE, AdaRank, SVM MAP, SoftRank, LambdaRank, LambdaMART, Borda Count, Markov Chain, and CRanking. The author explains several example applications of learning to rank including web search, collaborative filtering, definition search, keyphrase extraction, query dependent summarization, and re-ranking in machine translation. A formulation of learning for ranking creation is given in the statistical learning framework. Ongoing and future research directions for learning to rank are also discussed. Table of Contents: Learning to Rank / Learning for Ranking Creation / Learning for Ranking Aggregation / Methods of Learning to Rank / Applications of Learning to Rank / Theory of Learning to Rank / Ongoing and Future Work

Black Bounds Charlotte Byrd 2018-07-17 I don't belong with her. Born into darkness, life made me a cynic incapable of love. But then Ellie waltzed in. Innocent, optimistic, kind. That's where it happens...something I can never take back. I don't cheat on her. There's no one else. It's worse than that. Much worse. Can we survive this? Praise for Charlotte Byrd "This series thrilled me from the first page and had me completely engrossed. The pacing and plot was excellent. It had the perfect amount of twists and turns, luring me into the fantasy of this amazing book. The story was well-crafted, starting off with characters I fell in love with. I instantaneously bonded with the heroine and of course Mr. Black. YUM. It's sexy, it's sassy, it's steamy. It's everything. A Few Good Eggs in One Basket Richard L. Gunderson 2012-04-19 In a stock market environment dominated by professional investors, A Few Good Eggs in One Basket offers a plain-talk approach to profitability by selecting and managing an investment portfolio of common stocks for an individual. Author Richard L. Gunderson, who has been an investor for more than forty years, outlines an enduring framework that improves the odds for the individual investor to exceed the performance of the market over the long term by buying good companies at bargain prices. He outlines what constitutes a good company and how to determine when a price meets the test of being a bargain. A Few Good Eggs in One Basket also helps individual investors by discussing what to look for; where to look; when to buy; when to sell; and how many stocks to own. A Few Good Eggs in One Basket presents a prescription designed to take advantage of opportunities created by market overreaction to bad news and disappointing results. Gunderson believes there are always bargains at any time and in any market. The challenge is to consistently apply a disciplined approach to identifying the unusual and favorable opportunities and concentrating a portfolio on those stocks representing the best combination of overall quality and intrinsic value.
