Attacking Manual Jacob Aagaard 2009-11-01 The old masters of dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

Dyer 2012-05 Volvo revolutionised heavy truck design in 1964 with the introduction of the L4951 Titan TIPTOP. The new model brought the principle of the tilting cab to Europe and provided the foundations for the F88 of the following year. Safe, comfortable, powerful and reliable: the F88 was everything that the competition was not. 'Driver appeal' as a concept was born. Furthermore, it arrived exactly when the rapidly expanding international haulage scene needed it most. The result: Volvo could not fail to make an impact. The F89, with more power, followed in 1970 and the UK only F88 290 was introduced in 1975. Over a twelve-year production life, Volvo built over 60,000 examples of the F88 and F89. This second edition of Patrick Dyer's book includes virtually all the photographs that were in the original publication and also contains 50 additional shots, many from the Volvo company archive. This has enabled Patrick to give greater coverage to the G88 and G89 models which were infrequent visitors to the UK. Patrick has also heavily revised and developed his text. The format of the book is larger than before, in keeping with his books on Scania, DAF and the Ford Transcontinental.

Auto Repair For Dummies Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Honda Civic Robert Jex 2003-10 The Honda Civic is one of the most sought after cars in the modifying world. It has a massive following worldwide due to the great Japanese mechanics, and the potential to make what is essentially a dull car look great. So many looks, so many products - including products which are sometimes cheaper than standard parts replacements! But what if you have any problems - ill-fitting kits, no instructions, or instructions written in Japanese? Haynes can help with this new full colour guide to DIY modifying.
